EFT Server

“Simple. Fast. Secure.
The way file transfer should be.”

Growing companies can quickly find themselves with growing data needs. Before you know it there are remote locations, partner collaboration, and file transfer demands that present IT needs you may have never anticipated. Regardless of your company’s size, the need for data security and collaboration is unavoidable. GlobalSCAPE EFT Server provides a powerful yet cost-effective way to meet your unique security and compliance data requirements.

Features

GlobalSCAPE EFT Server is the ideal solution for growing companies facing the challenges that come with an increasing network of business partners and processes. The core EFT Server platform provides secure transport protocols, extensive user account control, and post processing workflow.

- Take advantage of all the essential connection protocols, including FTPS, SFTP, and HTTPS
- Trigger automated emails and external programs on simple server events
- Record client and server activity to a database for easy auditing and instant reporting.
- Manage account and password policies
- Choose your option of AD, NTLM, or ODBC authentication methods
- Provide added protection with the optional DMZ Gateway Server
- Comply with standards such as the PCI-DSS and FIPS 140-2 Validation

The security you need. The flexibility you desire.

EFT Server’s security architecture is designed to protect your important data with industry standard secure protocols such as HTTP/S and SFTP (SSH2). Even for the most sensitive of data needs, modules are available to facilitate PCI-DSS & FIPS Compliance. What’s more, EFT Server’s business integration features such as auditing, reporting, and simple automation make it the perfect solution for small and medium-sized businesses. As your company grows, migrate seamlessly to EFT Server Enterprise for higher levels of security and integration.

GlobalSCAPE EFT Server is positioned in the Leader’s Quadrant of the Gartner Magic Quadrant for the Managed File Transfer (MFT) market.
